Projects Details

Academic Project

Analyzed the chemical composition of water sources

- Analyzed the chemical composition of water sources in our surrounding area and prepared a list of water sources that are fit for drinking/domestic use and submitted our project to TMC and got an appreciation from them.

Training Institute (Jspiders, Bangalore) Projects

1. Website Clone

- Cloned and modified some of the websites like BMW, Louis Vuitton, Netflix, Amazon home pages using HTML and CSS for learning purpose.

2. Tic Tack Toe Game

- A Tic Tac Toe game, also known as noughts and crosses or Xs and Os, is a classic paper-and-pencil game typically played on a 3x3 grid. The game involves two players, traditionally using either X or O symbols, who take turns marking spaces in the grid.
- Developed using HTML, CSS, JavaScript is a great way to learn about programming logic, DOM manipulation, and event handling.

3. Student Database Management System

- A Student Database Management System is a comprehensive software solution designed to efficiently store, organize, and manage information related to students within an educational institution. This system serves as a centralized repository for student data, encompassing details such as personal information, academic records, attendance, and other relevant metrics.
